ORIGINAL DESIGN MANUFACTURING

DDK original design manufacturing process brings your vision to life.

With an eye on the current market demands , DDK creative team designs and developes your ideas using the most appropriate technologies , materials and current innovations.

SUSTAINABILITY & INNOVATION

Sustainability and innovations are key concepts in DDK's agenda for development and ecological transition.

DDK thinks green by introducing new policies for a sustainable growth , aiming to drastically reduce CO2 emissions and environment pollution . DDK first goal is reducing the energy dependence on non-renewable energy sources by relying on clean energy .

DDK's establishments are completely covered with solar panels , currently providing around 20% of the entire energy need . But it's not all about energy saving and air pollution .

Recycling is the second major strategy for reducing environmental pollution and plastic consumption . In 2022 , DDK reached the ambitious goal of using only recycled material for packaging ; the goal is to use recycled materials also for the saddle covers , plastic shells and bumpers in the very next years to come.

PASSION FOR GREEN

DDK TECHNOLOGY

AIR SUSPENSION

Air ball inserts to dampen vibrations

POINT FLEXIBLE

Pressure Release Point design

FAST TRACK POINT

Mount system for accessories

STRESS RELEASE

Shell and rail optimized to reduce saddle stress

SUPER LITE FOAM

Specific foam padding to reduce the saddle weight

RIDING POSITION

Choose the type of saddle you want according to your riding style

ATHLETIC(30°)

As you rotated forward,
your ischium contact point narrows.

(RACING /SPORT/ROAD/PERFORMANCE)

ISCHIUM POINT

MODERATE(60°)

Go the distance in comfort.

(MTB/TRK/GRAVEL)

ISCHIUM POINT

RELAXED(90°)

Use it every day, enjoy it every day.

(CITY/LEISURE/JUNIOR/KIDS/CRUISER/BMX)

ISCHIUM POINT

BREATHABLE

Shell cut to reduce pressure in the perineal area

WATERPROOF

Water repelling cover treatment

SCRATCH-PROOF COVER

Rugged covers to reduce scratches and UV damage

SOFT TOUCH

Soft touch cover for the softie in all of us

MICRO D : TEX COVER

Specific cover for anti-slip

ULTRA-TECH

High quality cover for VMFIT

SOFT PLUS

Increased cushioning for more comfort

HANDLE - GRIP

Handle - grip

We offer gender specific saddles

WOMAN

Due to the wider pelvis, women's saddles require specific sit bones comfort areas, different from men's saddles. They also need special features to avoid pressure on the soft tissue.

MAN

Having closer sit bones compared to women, men need a saddle with different sitting points. The pressure relief channel is of key importance to avoid unwanted pressure on soft tissue.

TAIPEI CYCLE
d&i awards 2025

by 

B15

ADJUSTABLE SADDLE

The B15 bicycle saddle features an innovative patented structure, specifically designed for children from childhood to adolescence. It solves the issue where traditional saddles cannot meet the riding needs of children across different age stages.

ergomatrix

ergometrix

Ergometrix saddles help to minimize the pressure on soft tissues , allowing to have more comfort and longer rides .

The ergonomic lines of the center hole are designed to improve comfort and support the pelvic area.

The bigger hole is the key element that reduces the pressure applied to the prostactic area.

Minimum pressure on soft tissues

Ergometrix shaped hole

ICHNOS

TECHNOLOGY

Ichnos saddles are designed to give a sensory feedback to the kid . The playful effect created by the shapes and colors encourages the kid to touch the saddle.

ICHNOS FAMILY

Ichnos is divided in 3 different families to provide a wider range of saddles for every need : **red** for racing , **green** for sport and **blue** for comfort .

comfort plus

TECHNOLOGY

High reduction of peak pressures and smart shock-absorbing are combined : Memory Foam ensures even pressure and perfect adherence to the body . Comfort density foam eliminates vibrations , for enhanced comfort and stability . Comfort Density and Memory Foam , the soul of Comfort Plus design is the combination of these two technologies.

TECHNOLOGY

Memory Foam guarantees comfort .
The pressure - relieving benefits of this material
prevent pressure sores and minimize pain in
sensitive areas.

Memory Foam covers the entire
surface of the saddle to give you
comfort in every position.

Memory foam under the sit
bones to absorb shocks and
allow a comfortable ride.

comfort DENSITY

COMFORT DENSITY

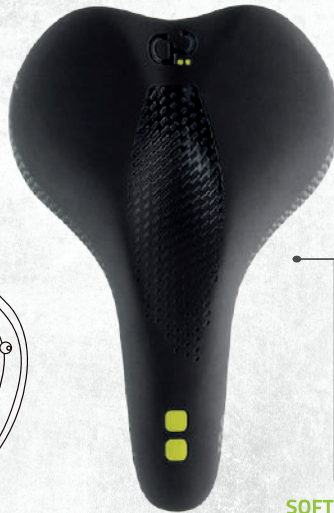

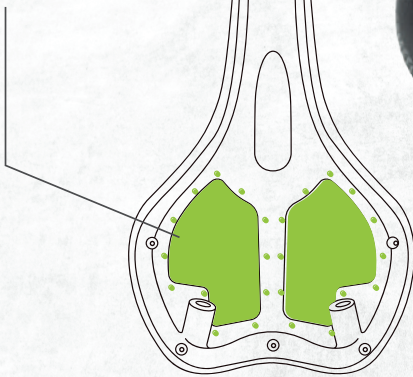

TECHNOLOGY

Double vibration absorption .
Most of the vibration absorbed by the interior coil spring ;
the remaining by the exterior barrel.

2 ZONE

Dual Density shell
with TPU inserts

SOFT PLUS

Increased cushioning
for more comfort

POINT FLEXIBLE

Pressure release point design

DDK-2023R

STYLE	JUNIOR/KIDS
SIZE(MM)	247X145
MATERIAL	SUPPORT FOAM
COVER	SEMI PU
RAIL	HI-TEN STEEL
WEIGHT(G)	355

DDK-1211

STYLE	JUNIOR/KIDS
SIZE(MM)	199X133
MATERIAL	SUPPORT FOAM
COVER	SEMI PU
SEATPOST	HI-TEN STEEL (Ø 25.4MM X 200 MM)
WEIGHT(G)	415

DDK-241

STYLE	JUNIOR/KIDS
SIZE(MM)	209X117
MATERIAL	SUPPORT FOAM
COVER	SEMI PU
RAIL	HI-TEN STEEL
WEIGHT(G)	203

DDK-i20

STYLE	JUNIOR / KIDS
SIZE(MM)	195X140
MATERIAL	SUPPORT FOAM
COVER	SEMI PU
SEATPOST	ALLOY (Ø27.2 MM X 200 MM)
WEIGHT(G)	370

DDK-i2005V

STYLE	JUNIOR / KIDS
SIZE(MM)	235X143
MATERIAL	SUPPORT FOAM
COVER	SEMI PU
SEATPOST	ALLOY (Ø 27.2 MM X 250 MM)
WEIGHT(G)	426
